

CoHGIS – Implementation of a GIS in Harare, Zimbabwe

*Ms. Sigrid Koneberg,
Landeshauptstadt München - Kommunalreferat - GeodatenService München*

The city of Harare will introduce a GIS as a basic instrument for the municipality. The objectives are developing a strategy, finding quick wins for more income for the city and improve the transparency of administration work.

A project has been started by the City of Munich (financed by Engagement Global) in cooperation with the City of Harare, the City of Bulawayo and the City of eThekweni (Durban). The project will be finished in 2018.
